

Job Description: Installation Engineer

Reporting to:

Engineering and Projects Manager

Introduction:

Chronos is a leading international authority on resilient synchronisation and timing solutions. We deliver equipment, installation, support and consultancy services to the telecom, energy, transport and broadcast sectors. We are an ISO 9001 accredited company and our one abiding philosophy is that our clients come first. Based in Lydbrook, we now require an additional Installation Engineer to join the team.

Main Responsibilities:

- To organise and complete site surveys, method statements and risk assessments
- To undertake the installation and integration of all products sold by Chronos
- To carry out consultancy, testing, measurement and report preparation for clients
- Pre-fabrication building and testing of Chronos designed equipment at Stowfield House and customer sites
- To complete the necessary documentation for all engineering procedures as required and in line with the Company's ISO9001 quality registration
- To undertake any in-house electrical testing and fault rectification plus general maintenance activity for Chronos Technology Ltd
- To supervise any sub-contractor install labour while on customer sites
- To be flexible and willing to travel anywhere and at any time

Other Responsibilities:

- To undertake internal and external training as required
- General housekeeping of the Engineering areas
- Preparation of installation kits
- To assist in any relevant company activity as required by the Engineering and Projects Manager

Essential Skills and Experience

- Previous telecommunications experience, including installation and cabling, ideally with an understanding of current and future network infrastructures
- BTEC in Electronic Engineering or equivalent
- IT Literate, (Microsoft Office, Visio) a working knowledge of IP networks / networking
- Professional, self-motivated and comfortable in all client facing scenarios at a technical level
- Clean driving licence
- Flexible, adaptable and willing to travel extensively throughout the UK and overseas as necessary, including weekends
- Physically fit
- 17th edition time served electrician (desirable)

Benefits:

We can offer the right individual a competitive salary, company profit-related bonus scheme, group personal pension plan with life assurance cover, 25 days' holiday plus Bank Holidays, childcare voucher scheme and a free canteen.

Applications by CV to joanne.akers@chronos.co.uk (to include salary expectations) by 7th January 2019. Further information about Chronos Technology Ltd can be found on our website www.chronos.co.uk
